

Year 5

Titanic Day

Thursday 16th March

How do you sink that which is unsinkable?

As part of our current Enquiry, Year 5 have been learning all about the Titanic. Through a history focus, we have explored the Titanic timeline, focusing on key dates, times and events. Through a Geography focus, we used maps and atlases to plot the planned route of the Titanic. This also involved naming continents and oceans.

To celebrate our learning so far and to find out what life was like on board, our teachers planned a Titanic day.

Welcome Aboard
the Titanic

Boarding passes were checked on entry!

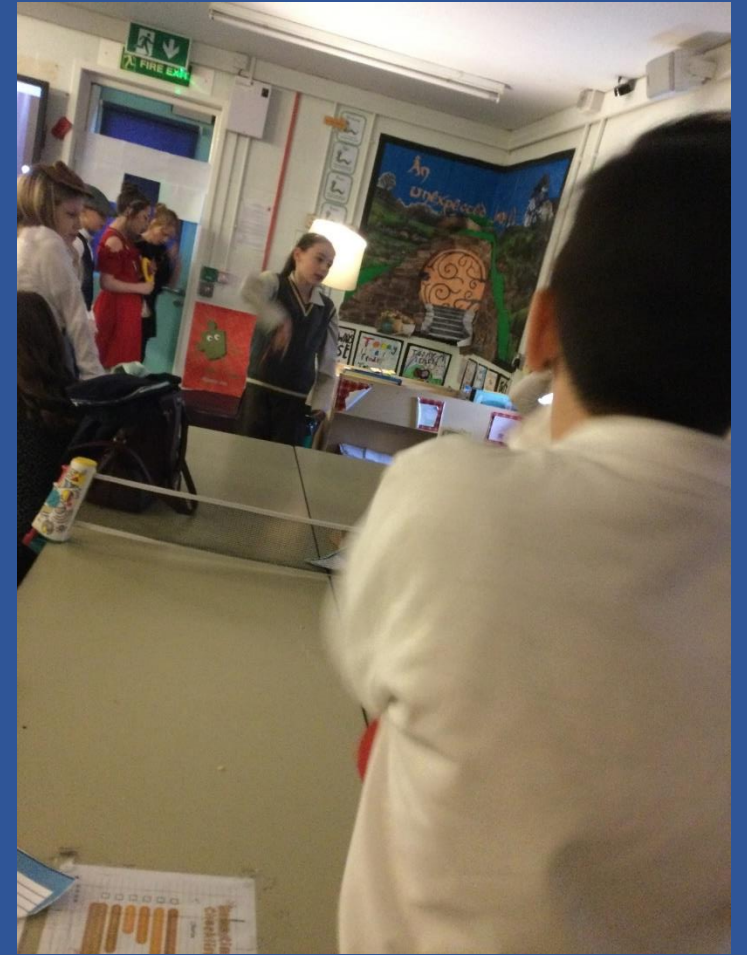

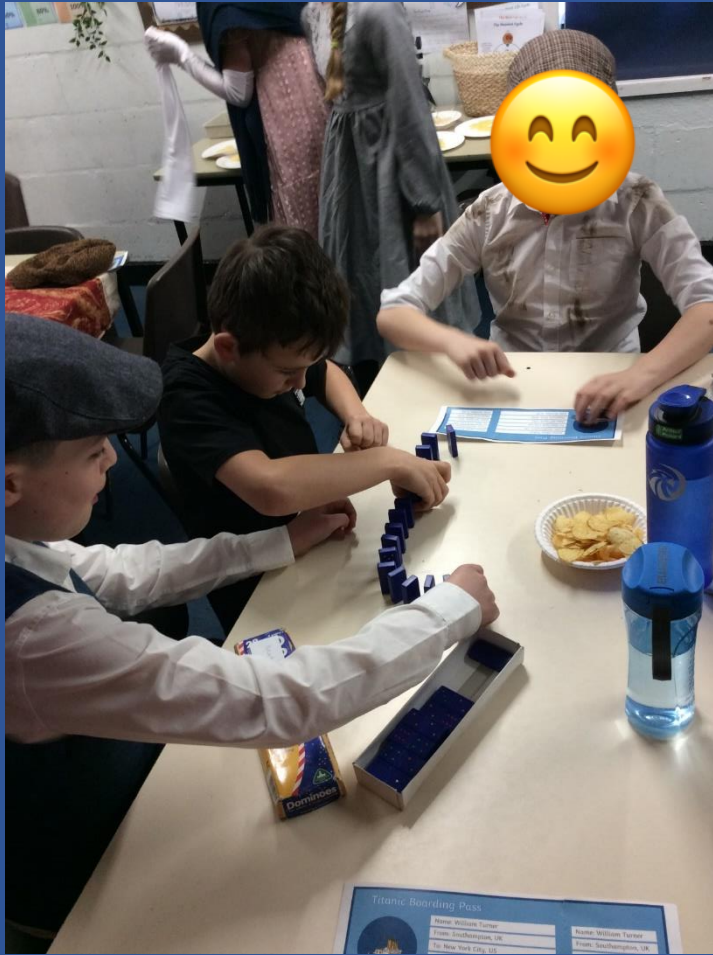

Titanic Boarding Pass

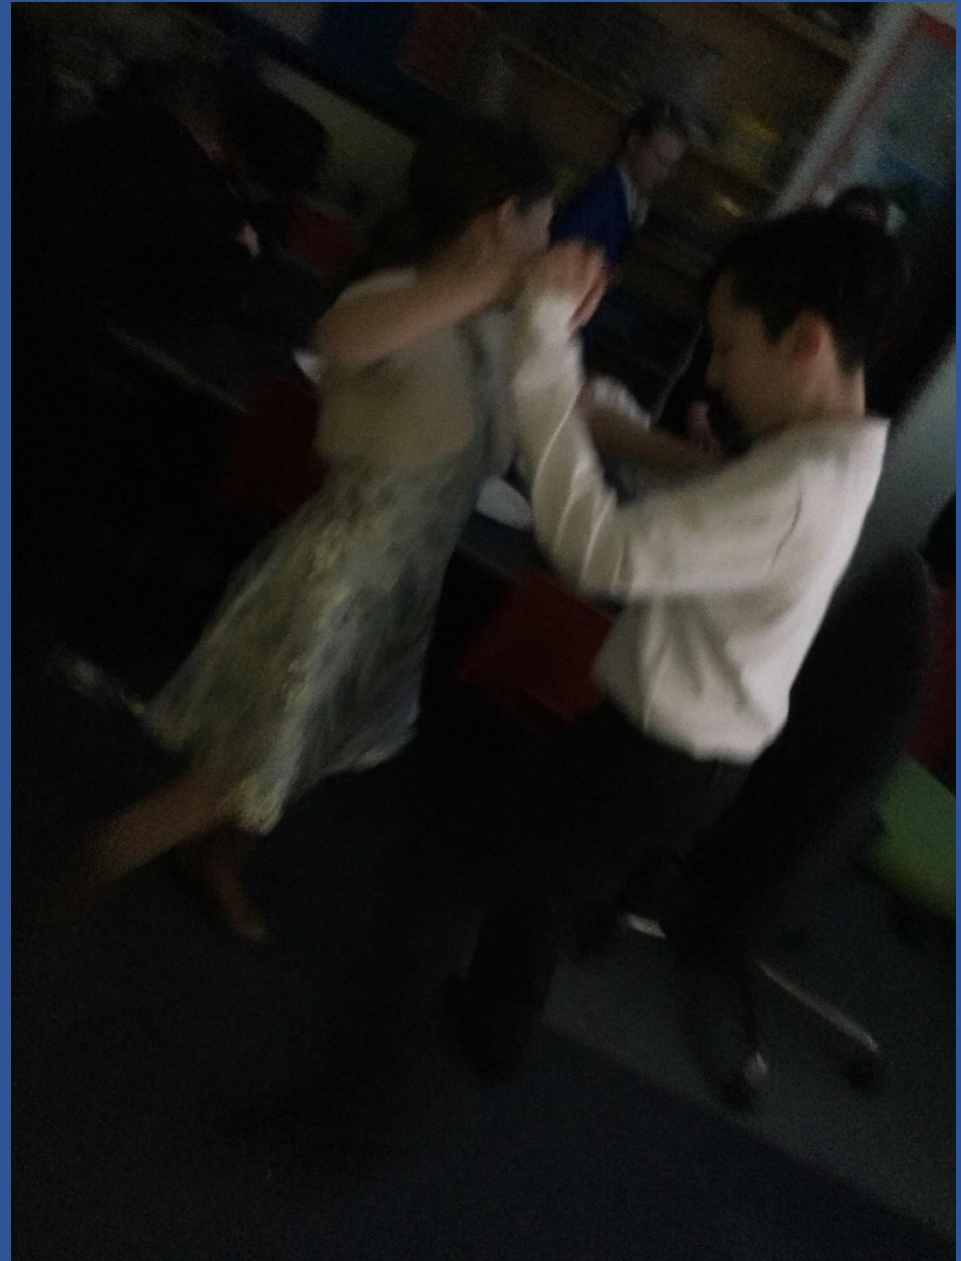

Name: Isobel Stace
From: Southampton, UK
To: New York City, US
Date: 10 th April, 1912
Departure Time: 9:00
Gate Number: 5 (C)

Departure Time: 9:00
Gate Number: 5 (C)

Once aboard the Titanic, guests had the chance to mingle and play some games.

Canapés and nibbles were served as the luxurious Titanic set off on its maiden voyage.

Port Hole Art

We noticed some icebergs out of the port holes and we used paint and collage techniques to recreate what we saw.

Water Resistance D&T Project

We worked in small groups to plan and design a boat that would be able to float on water against water resistance (cubes). We had to use our understanding of water resistance to predict how long our boat would last without sinking.

There was a catch! We could only use the following items:

2 pieces of A4 paper

6 match sticks

3 paper clips

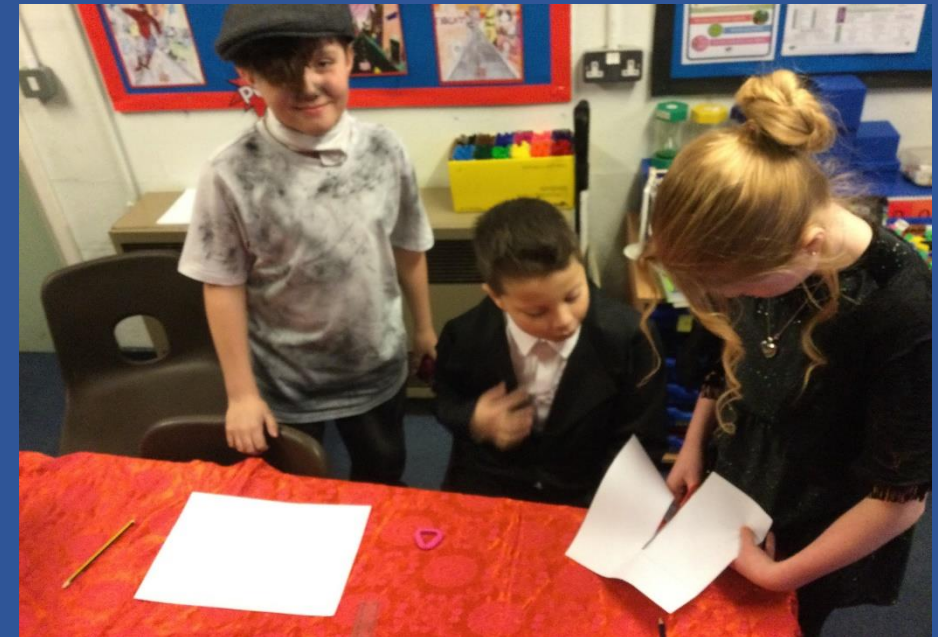

Scissors

Ruler

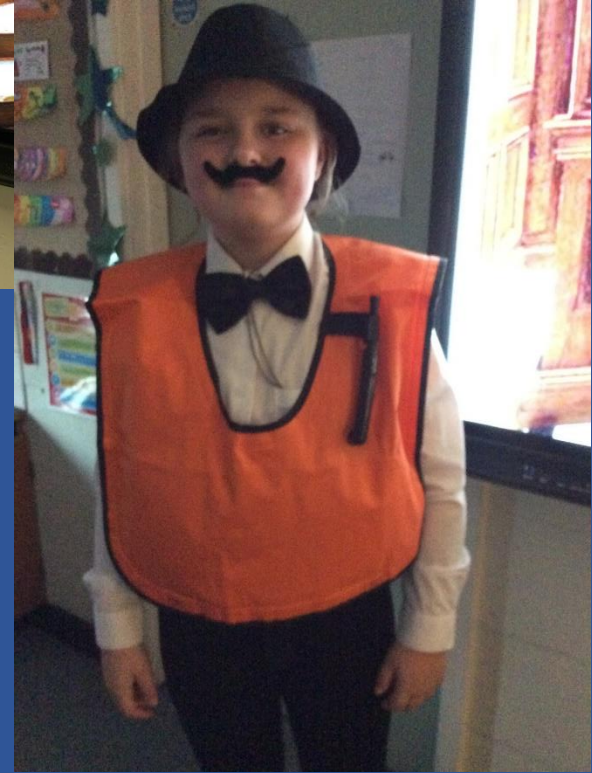

Sellotape

Masking tape

After testing our boats in the water, we evaluated our end product and discussed what we would do differently next time.

We had a great afternoon enjoying some on-board entertainment, which included: dancing, gymnastics singing, musical performances and comedy.

It was such a pleasant day aboard the Titanic.
We had great fun!
